

MEMORANDUM
of
UNDERSTANDING
Toward a Sustainable Future

COMMUNITY COMPACT

Building on successful collaboration, the City of Edmond and the University of Central Oklahoma have developed this Memorandum of Understanding Toward a Sustainable Future, to encourage further collaboration and to deepen our commitment to a more healthy, livable, and sustainable local community. The signatories will work to create a broader collaboration among themselves and with other community partners in order to leverage the combined capacities in research, teaching, innovation, program development and volunteerism.

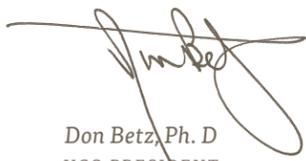

This community compact is a living and voluntary document that may evolve over time and does not commit either party to a specific action. Healthy stewardship with regard to our resources, whether they are fiscal, natural, or human, is a trust and responsibility of the utmost importance. This is an agreement to maximize local impact and enhance the sharing of ideas and solutions for the betterment of Edmond.

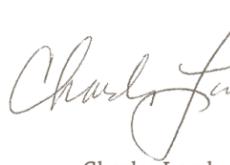

Areas of collaboration pertaining to this agreement may include, but are not limited to:

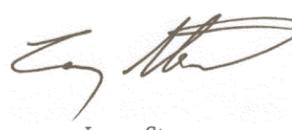

- Energy Efficiency, Conservation and Renewable Energy
- Healthy Ecosystems
- Alternative Fuels and Public Transportation
- Solid Waste and Recycling
- Urban Forestry
- Parks and Recreation Facilities
- Water and Wastewater Resources
- Educational Opportunities

QUARTERLY MEETINGS

In addition to the individual efforts of the City and its many departments, and staff at Central, the City of Edmond and the University of Central Oklahoma agree to designate a staff person from each party that will meet at a minimum of once quarterly to discuss topics as outlined above. Best practices and cost-effective solutions will guide the discussion, while considering additional ways to advance sustainable alternatives. Collaboration will take place on an ongoing basis with respect to the individual operations of each party.
